Dear Fellow Club Members:

This letter is going out a little earlier than most in order that you can get a copy of the map showing the Field Day location. The copies are not of the highest quality but should be good enough to use. Field Day is June 28th and 29th and you should start right away making up your check-list of what you want to take. The club will be in class 4A this year and the setup of the antennas will be a tremendous job. There are a few brave souls who will be going up to the Field Day site Thursday morning to get started. The ones I know about are K5RLW, WA5UHT, WA5ZNY and K5PFL. It is very important that anyone who can arrive early at the Field Day site should do so. Don't let all the work be done by just a few members. The Field Day workload should be shared by as many people as possible. If too many people stay away until the last moment then we probably will not be ready to go at the opening gun. With the rule changes in effect this year I believe that we will have our best shot at being the top station in our class nationally. So try to get a day or two off from work and let's get as many people out there early as we can.

We have two member-elects to vote on at this time. They are "Lucky" Baker, WA5RTB and Dave Blaschke, W5WZQ. Both Lucky and Dave have attended our last few meetings and both have gone through their 30-day waiting period for new members. You will find their ballots enclosed.

Also we will vote once again on the Constitutional change that states "New member elects must be introduced at a regular club meeting before they are voted upon for club membership." The last vote on this matter did not generate enough interest to make it valid. So we will try it one last time.

See you at Field Day!

73,

Richard L. King
Secretary - Texas DX Society

Texas DX Society Members,

Field Day, 1975 is almost upon us and the Generator Committee is asking your assistance. On the enclosed postal card, please indicate what electrical power cords, junction boxes, Tap-a-Lines, voltage monitors, gasoline cans, 110 Volt A. C. generators, ect that you have access to that is available for use this Field Day. Then return the postal card (on the same day you receive it) and the Generator Committee will personally contact you and let you know what items you listed are actually needed.

A supply of tags will be supplied by the Generator Committee so that your equipment will be "branded" and to prevent confusion when Field Day is over.

If you have any suggestions, comments, or questions I may be contacted at home 1-5922257 in Cleveland or at work at: 2223274 in Houston.

Old Bean

Also indicate on the post card about when you will be getting there.

73,

Sam Neal
